Legitary

Full Time | Vienna, Austria

Software Architect (Full Stack) (f/m/x)

Legitary GmbH provides a solution to audit streaming data and detect anomalies - in particular fraud. We validate music streaming & download data for labels, artists and music distributors and have the ultimate tool to gain control over streaming revenues. Become part of our mission to bring fairness & transparency to royalty accounting. **As Software Architect you will take a key role in creating a marketable software solution for our machine learning tool that will revolutionize streaming auditing**.

JOIN THE LEGITARY TEAM

WE TRUST YOU WITH RESPONSIBILITES

- Drive the development of our MVP into a scalable and marketable software product
  - define software architecture and design product roadmap
